### **VMAC Makes 2021 Best Workplaces In Manufacturing List, Once Again**

Nanaimo, B.C. — VMAC has earned its position within Great Place To Work®'s Best Workplaces™ in Manufacturing list, for the third consecutive year, joining Canada's top organizations in the manufacturing industry.

Great Place To Work determines the Best Workplaces list by reviewing confidential coworker responses to their Trust Index Survey, which requires coworkers to agree over a variety of criteria that their workplace is a 'great place to work'. The annual list of the very best is compiled from these responses, with VMAC on it for the third year in a row.

"This recognition is particularly meaningful to VMAC, as our coworkers agreed that VMAC is a great place to work during these very uncertain and unprecedented times," says Tod Gilbert, VMAC's President. "Our team has persevered through one of the most challenging years for businesses, and we've stayed focused on the future with strong people, processes, and products."

VMAC designs, engineers, and manufactures rotary screw air compressors and multi-power systems for the mobile service fleet industry. VMAC's systems are built in-house at its headquarters in British Columbia, Canada. Despite the turbulent global landscape and the ongoing worldwide pandemic, VMAC has proudly remained fully operational with its entire team intact.

"We prioritized the needs of our people and their families, working to provide stability, security, and safety," says Gordon Duval, VP of Sales & Marketing at VMAC. "Keeping our team strong meant VMAC was able to work together to overcome challenges, while remaining committed to the success of our customers, business partners, and community. We're very proud to be recognized as a Best Workplace in Manufacturing once again."

This recognition as one of the Best Workplaces in Manufacturing comes just months after VMAC was recognized as one of Canada's Best Managed Companies and a Best Workplace in Canada.
