

FOR IMMEDIATE RELEASE

VMAC Welcomes New Engineering Manager, Barry Fitzgerald

NANAIMO, BC -- VMAC is pleased to announce and welcome Barry Fitzgerald as the company's Engineering Manager. Barry will lead the Engineering and Custom Shop teams at VMAC and collaborate with the management team.

"We are excited to welcome Barry to VMAC," said Tod Gilbert, President of VMAC. "Barry's collaborative approach and extensive work experience is a great fit to lead and support our innovative engineering team."

Barry's work in a variety of engineering, supply chain, director, and management positions throughout the years provides him with a diverse and well-rounded perspective that will be valuable to VMAC's dealers, end-users, and internal teams.

Barry is a Professional Engineer who has worked in a variety of roles across numerous industries, including automobile, medical, renewable energy, and manufacturing. For example, he has worked for companies that provide: re-deployable shelters for the military, medical devices that detect early stage cancer, electro-mechanical graphic arts products, and tidal-turbine hydro power—just to mention a few.

Barry holds a Bachelor of Engineering from the University of Limerick in Ireland, as well as an MBA in Management of Technology from Vancouver's Simon Fraser University in Canada.

"I joined VMAC because it's a product development focused company with impressive capabilities and possibilities for the future," said Barry. "From my first meetings with the people here, it has been a great experience."

His appreciation for innovation and high-value solutions makes him an excellent cultural fit for VMAC, which provides world-class mobile air compressor and multi-power systems.

About VMAC

VMAC is the leader in mobile compressed air innovation and one of the only true air compressor manufacturers in North America. With over 30 years of history, this award-winning company designs and manufactures mobile air compressors and multi-power systems, earning a reputation for extraordinary build quality, durability, and reliability in extreme conditions among operators and fleet managers.
