New VMAC video illustrates unique advantages of RAPTAIR-G30 gas drive air compressor

Nanaimo, BC - June 21, 2016 - VMAC is pleased to announce the latest edition to its product video series. The VMAC RAPTAIR-G30 gas Drive Air Compressor at Work is a commercial illustrating the G30 system's unique advantages, and how easy it is get it up and running, and complete a job.

The one-minute-thirty-second video focuses on three major advantages of the RAPTAIR-G30 gas drive compared to its competitors; it provides 30 CFM, 100% of the time; it frees up 6 cubic feet on the truck body; it reduces fuel consumption by 4% by decreasing GVW. These are just some of the advantages that the RAPTAIR-G30 has over traditional disposable and lower CFM gas drive air compressors available in North America today.

To view the video, please visit www.vmacair.com/g30
